D. Other Knowledge Translation activities

This new section, added in September 2012, will include activities that are notable contributions to the greater good. There have been many KT activities in the past but only 2012 onwards will be added.

- **Lecturing and Coaching:**

June 2012: A plenary lecture was given by Dr. David Scheifele at the 13th National Immunization Conference in Darwin, Australia. “*Canada’s Immunization Monitoring Program, Active (IMPACT): Looking back, looking forward*”. This lecture invitation then enabled “coaching” with the faculty of the PAEDS surveillance network (Australia’s IMPACT equivalent).

- **Federal/Provincial/Territorial Information sharing:**

Quebec Provincial Advisory committee - provided a summary of the Quebec IMPACT influenza surveillance from 2009-2012 including fatalities.

- **International Information sharing:**

FDA requested some copies of already presented abstracts and posters with respect to surveillance of meningococcal invasive infections.

- **Liaison with other networks:**

A new liaison member of ISARIC - *International Severe Acute Respiratory Infection Consortium*. ISARIC is a multi-regional collaboration of research networks with a focus on Investigator-led clinical studies in adults and children. ISARIC’s mission is both to conduct world-class clinical research in the inter-pandemic influenza period and to provide a collaborative platform through which clinical studies could be undertaken rapidly in response to the emergence of a novel respiratory pathogen or other new infectious disease outbreak. <http://isaric.tghn.org/about/>

- Collaborated with the PRIDE (Post-pandemic Review of anti-Influenza Drug Effectiveness) study group which is conducting a patient-level global meta-analysis on the effectiveness of antiviral use on outcomes of public health importance during the 2009/10 (swine) influenza A/H1N1v.

<http://www.nottingham.ac.uk/research/groups/healthprotection/projects/pride.aspx>

- IMPACT collaborates with Global Research in Paediatrics Project (GRiP), funded by the European commission. The aim of GRiP is to stimulate and facilitate the development of and safe use of medicines and vaccines in children. Databases are not linked but non-nominal data common to multiple databases are extracted and merged. S. Halperin participated on behalf of IMPACT. <http://www.grip-network.org/index.php/cms/en/home>

- IMPACT collaborates with the Brighton Collaboration as part of Canada’s national AEFI reporting system. <https://brightoncollaboration.org/public>
